

Also known as: AlgoJob, Algojobs, AlgoHR, the platform, the app

Audience: candidate, recruiter, college admin, university admin

Last verified: 2026-09-18

AlgoJob — platform overview

This is the index file for the AlgoJob knowledge base. Read it first: it defines who the users are, what every product is called, and the rules that apply across the whole platform. Each other file covers one product area in depth.

1. What AlgoJob is

AlgoJob is a career-readiness and hiring platform. Students and job seekers practise on it every day — aptitude tests, spoken English, debugging, coding, and AI-led mock interviews — and get a report after each attempt that tells them what to fix. Recruiters use the same platform to post jobs, screen candidates and run AI interview rounds. Colleges and universities use it to track how their students are progressing and who needs help.

Everything runs in a web browser. There is no mobile app and no desktop download.

2. Who uses it

Persona	What they are called in the product	How they sign in
Candidate	student, job seeker, candidate	<code>/user/login</code> or <code>/student/login</code>
Recruiter	HR, AlgoHR user, employer	<code>/company/login</code>
College admin	placement officer, TPO, college admin	<code>/college/login</code>
University admin	university admin	<code>/university-login</code>

A person has one role. A candidate account cannot sign in to the recruiter portal and vice versa.

3. The products, by name

Candidates see these in the left-hand menu, in this order:

Menu name	What it is	Detail file
Campus Buzz	The home feed — posts, likes, follows, achievements	<code>23-campus-buzz-and-profile.md</code>
Analytics	Personal performance dashboard, skill radar, heatmaps	<code>23-campus-buzz-and-profile.md</code>
Code Byte	Five-phase coding evaluation	<code>33-code-byte-and-coding.md</code>

Menu name	What it is	Detail file
Mock Aptitude	The "Daily 20" — 20 questions across 4 sections	<code>31-mock-aptitude-daily-20.md</code>
Mock Debug	Explain and debug code out loud	<code>32-debug-arena.md</code>
Mock SVAR	Spoken English assessment	<code>30-svar-spoken-english.md</code>
AI Interview	Live AI-led mock interview	<code>40-ai-mock-interview.md</code>
Report	All reports across every product	each product file, section 7
Payments	Plans, top-ups, order history, invoices	<code>21-plans-credits-and-billing.md</code>

Together, Mock Aptitude, Mock Debug, Mock SVAR and the coding practice are called **the arenas**.

4. Names and terms (aliases → canonical)

Users rarely use the official name. Map these:

A user might say	They mean
communication test, English test, speaking test, AlgoApex, APEX	Mock SVAR
Daily 20, daily twenty, aptitude, MCQ practice, practice test	Mock Aptitude
viva, debug viva, code explanation test	Mock Debug
coding round, DSA practice, the 5-phase test	Code Byte
mock interview, AI interviewer, the bot interview, HR round	AI Interview
the feed, posts, buzz	Campus Buzz
points, coins, XP	XP (experience points)
credits, sessions, tokens	credits — interview credits or assessment credits
premium, paid plan, subscription	PRO
free plan, normal account	Basic
proctoring, monitoring, camera check, cheating detection	proctoring

XP and credits are different things. XP is earned by practising and never spent directly; credits are spent to start an AI interview. XP converts into credits at a fixed rate — see `22-xp-levels-and-rewards.md`.

5. Rules that apply everywhere

- **Plans are Basic (free) and PRO (paid).** There is no other plan. See `21-plans-credits-and-billing.md`.

- **PRO raises your limits; it does not unlock products.** Every arena and every basic report is available on the free plan. PRO subscribers get more attempts per week, more daily XP, advanced reports and cheaper top-ups. This is the most commonly misunderstood thing on the platform.
- **The arena limit is weekly, not daily.** Basic gets **3 attempts per week** of each arena; PRO gets **4 per week**. The week resets on a rolling weekly basis, not on a calendar day.
- **Reports are not instant.** Anything scored with speech or AI takes a short while after you submit. Check the Report section rather than waiting on the results screen.
- **Practice is single-device, single-session.** Starting the same assessment in two tabs or on two devices is blocked.
- **Everything is in English**, and spoken assessments expect English answers.
- **Prices are in Indian Rupees (INR) and shown inclusive of 18% GST at checkout.**

6. What happens after you finish an assessment

1. You submit (or the timer runs out, or the test is ended for you).
2. The attempt is recorded immediately and counts against your weekly limit.
3. Scoring runs in the background.
4. The report appears under **Report**, and you get a notification when it is ready.

Scores are never shown on the final screen of a proctored test — that is intentional. Go to **Report**.

7. Support and escalation

Support is available through the in-app messenger on most pages. It is deliberately **turned off during a proctored test or a live interview** so it cannot be used as a channel during an assessment. Finish or exit the assessment first.

See `99-escalation-and-limits.md` for the questions that must always go to a human.

8. File index

File	Covers
<code>00-platform-overview.md</code>	This file
<code>10-web-app-and-test-environment.md</code>	The web app, the secure test window, hardware checks
<code>20-accounts-and-login.md</code>	Signing up, signing in, profile, notifications
<code>21-plans-credits-and-billing.md</code>	Basic vs PRO, prices, top-ups, credits, billing
<code>22-xp-levels-and-rewards.md</code>	XP, levels, leaderboards, rewards
<code>23-campus-buzz-and-profile.md</code>	The feed, profile, analytics, referrals
<code>24-recruiter-portal.md</code>	AlgoHR
<code>25-college-and-university-portal.md</code>	College and university dashboards

File	Covers
30-svar-spoken-english.md	Mock SVAR
31-mock-aptitude-daily-20.md	Mock Aptitude
32-debug-arena.md	Mock Debug
33-code-byte-and-coding.md	Code Byte and coding practice
40-ai-mock-interview.md	AI Interview — booking and reports
41-interview-agent-behaviour.md	What the AI interviewer does
42-proctoring-and-integrity.md	Proctoring rules and consequences
26-job-matches.md	Job matches and recommendations
99-escalation-and-limits.md	Hand-off rules and unavailable features
