XP, levels, leaderboards and rewards

1. What this is

Everything you do on AlgoJob earns **XP** (experience points). XP does two things: it moves you up through six **levels**, each of which unlocks a reward, and — most usefully — it converts into **free AI interview credits**. On the free plan, XP is how you get interviews.

2. Who can use it

Every candidate. PRO subscribers earn at higher daily caps and get a larger level-up bonus, but the system works fully on Basic.

3. Names and terms

A user might say	Meaning
points, coins, score	XP
rank, position	your place on a leaderboard
level, badge, tier	one of the six levels
streak	not a feature — see section 10
credits	interview credits, which XP converts into — not XP itself

 **XP is not a currency you spend.** You never spend XP. It accumulates, moves your level, and automatically converts into interview credits at a fixed threshold.

4. How you earn XP

Activity	XP	Daily cap (Basic)	Daily cap (PRO)
Signing up	25	one-time	one-time
Completing your profile	100	one-time	one-time
Logging in	5	5 XP (once a day)	5 XP
Mock Aptitude	1 per correct answer	25 XP	50 XP
Coding practice	2 per correct answer	10 XP	20 XP

Activity	XP	Daily cap (Basic)	Daily cap (PRO)
Mock SVAR	20 per test	20 XP (1 test)	20 XP
Mock Debug	20 per test	20 XP (1 test)	20 XP
AI Interview	100 per interview	1,000 XP (10 interviews)	1,000 XP

Remember the weekly arena limits still apply on top of these daily caps — 3 attempts a week on Basic, 4 on PRO. See `00-platform-overview.md`.

5. XP to interview credits

Every 300 XP earns you 1 AI interview credit, valid for 3 months.

This conversion counts XP from logging in, Mock Aptitude, Mock SVAR, Mock Debug and AI interviews. It happens automatically — there is no button to press.

On the Basic plan this is the only way to get interview credits without paying.

6. Levels

Level	XP required	Level-up bonus XP
Novice	0	—
Insignia	1,000	350
Oracle	2,500	700
Gauntlet	4,500	1,000
Mythos	7,000	1,300
Warlord	10,000	1,600

PRO subscribers get a 1.5× multiplier on the level-up bonus. Reaching Oracle on PRO pays 1,050 instead of 700.

Each level you reach can be **claimed**, which gives you a reward and a downloadable **certificate** (PDF). Levels show as `locked`, `active` (reached, not yet claimed) or `claimed`.

Some level rewards are physical merchandise. Claiming one asks for a shipping address.

7. Leaderboards

- **Monthly leaderboard** — ranked on XP earned in the current month, so it resets each month and a new user can compete.
- **College leaderboard** — the same, limited to your college.
- **Skill rankings** — where you stand on individual skills.

Your all-time XP total is separate from your monthly leaderboard XP. Levels use your total; the leaderboard uses the month.

8. When things go wrong

"I finished a test but got no XP"

Scoring for SVAR, Debug and interviews happens in the background, and XP is awarded when scoring finishes. If you left the page before that, the XP is granted the next time you visit. Open the platform again and check your balance.

"I hit my daily XP cap"

Caps are per activity per day — 25 XP a day from aptitude on Basic, 50 on PRO. Once capped, further attempts that day still count against your weekly arena limit but stop earning XP. Come back tomorrow.

"My interview credit did not appear at 300 XP"

The conversion counts XP from logging in, aptitude, SVAR, Debug and interviews. XP from signing up and completing your profile does not count towards it. Check the credit balance on the AI Interview page rather than the XP total.

"I went up a level but got no bonus"

The bonus is awarded at the moment you cross the threshold. If your level display has updated but the bonus has not, refresh; if it still has not after that, contact support.

"My leaderboard rank dropped even though I earned XP"

The monthly leaderboard ranks on XP earned this month. Others earning faster will pass you, and the board resets at the start of each month.

"My level says active but I cannot claim it"

Claiming a physical reward needs a shipping address. Add one under the reward claim flow.

"My certificate will not download"

Certificates are generated as PDFs on claim. Try again, and if it still fails contact support with the level name.

9. Common questions

How do I get a free AI interview? Earn 300 XP. It converts automatically into one credit, valid 3 months.

How fast can I earn 300 XP? Roughly: one SVAR and one Debug test is 40 XP, a full day of aptitude is up to 25 (50 on PRO), and logging in is 5. Completing your profile is a one-off 100. A consistent week gets most people there.

Do I lose XP if I do badly? No. XP is never deducted.

Does XP expire? XP does not expire. The **interview credits** it converts into expire after 3 months.

Can I buy XP? No. XP is earned only.

Does PRO give me more XP per test? Not per test — the same 20 XP for a SVAR test, for example. PRO raises the daily **caps** and the level-up bonus, and gives you an extra attempt per week.

What is the highest level? Warlord, at 10,000 XP.

Do my levels reset? No. Levels and total XP are permanent. Only the monthly leaderboard resets.

Is there a daily streak bonus? There is a daily login reward of 5 XP. There is no separate streak multiplier.

10. What this does not do

- XP cannot be spent directly, transferred, or bought.
- XP is never deducted for poor performance.
- There is no streak multiplier beyond the daily login XP.
- **Referral rewards are not currently credited.** Referral codes exist, but do not promise a reward for referring someone — see `23-campus-buzz-and-profile.md`.
- The "Blue Tick" shown on the PRO plan card is **not currently available**.

11. When to contact support

- XP not awarded more than a day after a completed, scored test.
- A level crossed with no bonus and no certificate.
- A claimed physical reward with no shipping confirmation.
